Experience

Meetanshi - Magento Development Company
2020 - 2022

Website - Myloomtile

- Created a dynamic, multi-page website using HTML, CSS, and JavaScript for a seamless user experience.
- Designed captivating model and fabric pages, showcasing products with flair and attention to detail.
- Enhanced user interaction with advanced JavaScript and jQuery, implementing engaging interactive features.
- Integrated intuitive filtering for easy item selection, improving user-friendliness.
- Ensured a visually appealing, responsive design across various devices using CSS, collaborating effectively within a team for a cohesive end product.

Website - Blichmann Engineering

- Enhanced website interactivity and design with Bootstrap for a visually appealing interface.
- Optimized user experience by designing impactful banners and cards for effective display of ads, products, and details.
- Improved usability by dynamically displaying product availability using JavaScript.
- Elevated user engagement through engaging support and wine-making pages built using Bootstrap and JavaScript.
- Delivered innovative web solutions meeting both client and user expectations, showcasing a fusion of technical proficiency and creativity."

Projects

Portfolio Website
Humber College, Canada

- Built a professional portfolio site using HTML, CSS, Bootstrap, and JavaScript, ensuring a polished display of skills and projects.
- Crafted a welcoming page featuring a brief introduction and user-friendly navigation.
- Established a top header for easy access to crucial sections: About, Projects, and Contact.
- Provided a comprehensive personal introduction, highlighted skills in the About section, and dedicated a separate page for academic project portfolio display.

Employee Leave Management System
LDRP Institute of Technology & Research, India

- The implementation of ELMS to automate the manual systems with the aid of robust software solutions and computerized equipment.
- Development of a system that effectively stores and manages valuable data, providing seamless access and easy manipulation.
- ELMS is structured in such a way that long-term storage of data is possible, preventing data loss and ensuring data integrity over time.
- The design of the system enables convenient and easy access to stored data, enhancing overall productivity and efficiency.
